Using Graphic Organizers

Graphic Organizers are visual and memorable ways of helping students to organize their reading-inspired thoughts, or their reading-related studies. They can be used for 'while reading' activities, as ways of organizing self-study reading more clearly, and to help students prepare for later writing or speaking activities. The *Dominoes* Graphic Organizer pdfs are in the Photocopiables folder. Many can be used with a range of *Dominoes* at different levels. Others are for specific levels. Suitable levels are listed at the top of each Graphic Organizer page. We have made suggestions in this introduction as to when the Graphic Organizers may be used, though teachers can use them in alternative ways to suit the needs of their classes and their own teaching styles. In general, we suggest assigning, or offering the students a choice of, a couple of different Graphic Organizers to work on with each *Domino* they read.
