

Unit 4

Listening script [1.05]

- Radio presenter** This week, the two-day Eco Technology show came to Brighton and we sent our environment and tech expert, Lindsey Howard, to find out more. Lindsey, what's the show about?
- Lindsey** Well, this is an annual show that has lots of new technology, and this is its fourth year. There are a lot of different exhibitors and there's an amazing Innovation Zone, where you can see all the most recent gadgets.
- Radio presenter** What gadgets have you noticed?
- Lindsey** I was really impressed by an electric car that is great for the environment.
- Radio presenter** Interesting! You also saw some energy-saving machines for the home, didn't you?
- Lindsey** Yes, I did. One of the best was a robot for the house. You can tell it what to do. This helps you do all the jobs you hate. It can turn lights, music and machines on and off. It can help you save time and energy. It's like an extra member of the family – it can wake you up in the morning and make breakfast.
- Radio presenter** That sounds brilliant.
- Lindsey** And finally, Martin, I know you love watching TV. Well now you can watch the Eco TV as much as you like without feeling bad about damaging the environment. It uses recycled materials. It senses when there is enough light in the room, and it is able to use solar power during the daytime. Even the remote control is solar powered!
- Radio presenter** That's fascinating! Thanks for your report, Lindsey.
