

REVISION NUMBERS, NUMBERS...

First grade

Check out these simple ways of revising numbers.

ACTIVITY 1

STEP 1: Put cards with numbers from 1-10 in a hat or just spread them on the desk face down.

STEP 2: Students choose a card, put it on their head and start guessing the number by asking : „Is it number 5? Is it number 7? Is it number 1?“ etc.

STEP 3: Other students say YES or NO depending whether the student guessed correctly or not.

The winner is the student who guesses it first!

ACTIVITY 2

Another great way of reinforcing the numbers is having your students walk around the classroom. When you say „Stop!“ or „Freeze!“ , you give them specific instructions which include numbers, e.g. Jump 5 times/Blink 10 times/Clap 3 times etc.
